Metzner MA 2000
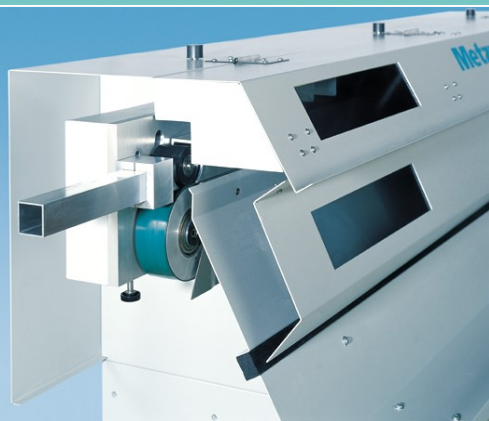

The automatic material stacker with intermediate sorter pocket
for all round materials up to 30mm in diameter

Metzner

With its special advantages and the unique ability to handle a large range of cable diameters, the Metzner cable stacker MA 2000 is the ideal addition to your cable processing machines. It automatically manages the sequential sorting of the processed cables.

A unique tool

The cable stacker is directly interfaced to the control of the cable processing machine. As a result transportation and positioning of the processed cables is synchronised with the working cycle of the processing machine.

The ready processed cables are first placed into a useful intermediate sorter pocket. This allows enough time for the operator to remove the previous batch of cables from the collecting trough and prevents mixing of different batches. Cables can be removed without interrupting the machine operation. When designing this cable stacker, Metzner put great emphasis on the ability to handle a wide range of cable diameters. The ability to handle cables from 1,5mm up to 30mm makes the Metzner cable stacker a unique tool in the cable processing market.

Technical data

Cable diameter	Flexible cables from 1,5mm to 30mm diameter
Cable length	From 250mm up to 2.000mm, optional up to 6.000mm
Control system	Interface to cable processing machine
Speed	Adjustable, up to 180 m/min.
Power supply	230 VAC, 6A
Compressed air supply	6 bar
Dimensions	2.400mm x 650mm x 1.250mm (L x W x H)
Weight	125 kg

Available models

Order-No.: 110-00421	MA 2000/40/ZW – for flexible cables up to 2 m length
Order-No.: 110-00422	MA 4000/40/ZW – for flexible cables up to 4 m length
Order-No.: 110-00423	MA 6000/40/ZW – for flexible cables up to 6 m length

Optional features

Order-No.: 230-02138	Pneumatic roller lifting to handle PU- and large diameter cables

Specifications are subject to change without notice.

The advantages at a glance

- Handles all cable diameters from 1,5mm up to 30mm
- High processing speed
- Intermediate collection bay to allow previous batch to be removed as a standard feature
- No interruption of cable processing during removal of cables
- Intelligent interface to cable processing machines
- Expandable for cables up to 6 m in length
- Modern design
- Strong and robust construction
- Ultra quiet operation
